

WASTEWATER TREATMENT UNIT (WTU)

TEMS
INTERNATIONAL

The unit is for removing hydrocarbons, aromatic compounds, hydrophobic substances and solid particles from slop/waste water as well as produced water.

Features and Benefits

- Accessories (supplied with unit)
- Discharge less than 1ppm oil in water
- Small footprint vs. capacity
- Permanent or temporary equipment
- Low energy consumption
- Certified to offshore standard
- Fully automated or operator dependent

Applications

- Produced water
- Fracking water treatment and reuse
- Slop/mud water
- Brine/completion fluid for reuse
- Tar/bituminous sands
- Refinery wastewater
- Closed drain and wash water
