

OVERVIEW

A leading offshore exploration and production company with Deepwater and shallow water assets in the Gulf of America contracted TEMS International to support drilling operations.

TEMS Technical Environmental Specialists oversaw all drilling operations and recorded all subsequent information.

The overall aims of the project were to:

- Achieve governmental oil on wet cuttings (OOWC) limitations in line with EPA reporting
- Optimise solids control equipment to deliver maximum solids removal with minimum liquid retention
- Reduce synthetic based mud surface consumption
- Reduce shaker screen consumption
- Minimise environmental impact
- Reduce carbon footprint

- **Location:** Gulf of America

➤ **Project date:** August 2025 to November 2025

➤ **Drilling duration:** 81 days

➤ **Total metres drilled:** 20,834ft

2,224	➤ Fewer barrels of mud used
\$456,312.00	➤ Saved on mud costs
\$85,500.00	➤ Equipment hire savings
\$65,000.00	➤ Personnel for equipment savings
N/A	➤ Estimated rig days saved
N/A	➤ Estimated rig day rate
N/A	➤ Estimated savings on rig day rate
N/A	➤ Estimated boat days saved
N/A	➤ Estimated boat day rate
N/A	➤ Estimated savings on boat rate
\$1,953,527.00	➤ Total assumed savings for the well
4.12%	➤ Final well ROC including SVD %
